

## NEW! Gynecology-only office

OB-GYN Associates of Santa Cruz is proud to provide a "gynecology-only" office with services provided by Dr. Anne-Marie Jackson. How does this benefit you? Since Dr Jackson does not balance the demands of obstetrics with the practice of gynecology her schedule is more flexible, allowing for more time to answer your concerns and to accommodate last minute, urgent care appointments when needed. Additionally, there is much less chance that your appointment will be canceled because your physician will not have to leave to attend an unexpected delivery.

"Gynecology-only" does not mean that we don't see pregnant women. Dr Jackson is very interested in helping women achieve their dreams of becoming pregnant, and does the basic workup for infertility as well as offering treatments for infertility, including any necessary surgical procedures and inseminations. Once you do become pregnant, she will see you safely through your first trimester and help you decide where to continue your care for the remainder of your pregnancy.

Our "gynecology-only" services include the initial pregnancy confirmation and evaluation, ultrasound, and treatment of any problems of the first trimester of pregnancy.

At OB-GYN Associates of Santa Cruz, we have focused our efforts to develop services that will address the many diverse needs and concerns of women. Whether the patient is a young woman who needs family planning or a menopausal woman with issues of incontinence or menopause, we will address your needs with a full evaluation. All of our physicians are board-certified in obstetrics and gynecology and have been on the staff at Dominican and Sutter for over ten years. Our midwifery group is the largest in the county and is staffed with certified nurse-midwives who can respond to most urgent gynecologic needs as well.

The new "gynecology-only" office is conveniently located near Dominican Hospital, at 1595 Soquel Drive, Suite 130 with a laboratory and pharmacy on the premises.

We are dedicated to offering a comprehensive approach to women's health, where we can evaluate and treat patients in a friendly and comfortable environment of well-equipped clinic. Our goal is to make it easy for you to obtain board-certified, trusted care, for a lifetime of good health.
